

Estimated Monthly Cost

AWS Service	Suggested Configuration	Estimated/Month
EC2	1 × <code>t3.small</code> , Linux	\$15–25
RDS PostgreSQL	<code>db.t3.micro</code> , Single-AZ, 20 GB	\$15–25
EBS	20 GB gp3	\$2–3
ECR	~10 GB Docker images	\$1–2
Secrets Manager	3–4 secrets	\$1–2
CloudWatch	Application/system logs + basic monitoring	\$1–5
VPC	VPC, subnets, security groups	\$0
ACM	Public SSL certificate	\$0
S3	~20 GB documents/files + low requests	\$1–2
SES	Low-volume HRMS emails	\$0–1
SNS	Low-volume notifications	\$0–1
Fargate	Not used	\$0
Estimated Total		~\$36–67/month

Estimated Cost in Indian Rupees

Using a rough planning rate of ₹90/USD:

Period	Approximate Cost
Monthly	₹3,240–₹6,030
Yearly	₹38,880–₹72,360

It would be reasonable to keep an initial budget of around **₹6,000–₹8,000 per month** to allow for variations in storage, logs, data transfer, email, and notification usage.
